KANE INSTRUMENTATION LTD.

Specializing in Instrumentation and Oilfield Equipment

Cable Cutter

Features

- Manual Cable Cutters are self-contained hydraulic units that are precision engineered tools designed to give a clean cut with minimum effort.
- Simply pump the handle (no outside power is required).
- Cable Cutters are easily carried and are used by contractors, rigging lofts and elevator repairmen.
- These units are recommended by wire rope manufacturers worldwide.
- Models can operate under water (with slight modification).
- Available in 3/4", 1-1/8" & 1-3/4" capacity.
- Impact Cutters are also available as a less expensive alternative and are used by striking with a hammer.
- These units come in 3/4", 1-1/16" & 1-1/2" capacities.

How To Order

- Manual or Impact Cutter
- Capacity of Line
