## 1502 Pressure Sensor (Diaphragm Protector)

### Features

- 1502 Pressure Sensors (or Diaphragm Protector) protect the measuring or recording device from working fluid while transmitting a no-lag, linear pressure signal.
- Rugged workhorse sensor (rubber (standard), Viton or urethane) found in every corner of the world doing every conceivable pressure sensing job.
- Robust, time proven design allows easy field repair and maintenance.
- Available in flanged, threaded, and weld-on (butt-weld) female sub configurations.
- Certified models available.

### How To Order

- Maximum Working Pressure
- Hammer Union Size
- Type of Sub
- Standard or H2S Service
