Coil Tubing Weight Indicator

Features

- Coil tubing indicator systems are designed to give accurate weight readings for a coil tubing string in the wellbore.
- Designed to be single or dual acting depending on the needs of the coil tubing unit.
- System includes either a 6" or 8.5" weight indicator, bracket, hose and compression load cell.
- Available in a variety of configurations for all coil tubing applications.
- System is built to suit for your application.

How To Order

- Size of Indicator (Only for Single Pointer)
- Capacity of Indicator
- Ratio of Unit (e.g.: 2:1)
- Single or Dual Pointer
- Length of Hose
- Scale Required (lbs., kgs or daN)
