Electronic Gauges

Features

- The electronic gauges (Indicators) come in a variety of different formats and sizes to suit your needs eg: 6" or 8-1/2".
- They can be read in weight, pressure, flow, RPM, SPM, etc. with the appropriate dial.
- The gauges can also be used in conjunction with a digital display, either built in or separate.
- These units operate in temperatures from -40°C to 85°C.
- They can be ordered in either backlit or standard and approved with Class I Div I (in few models) and Class I Div II (all models).

How To Order

- Type of Gauge
- Capacity of Indicator
- Input Signal
- Options:
 - Basic, Backlit and/or Digital Display
 - Sensor or Load Cell
 - Length of Signal Cable (gauge to sensor or load cell)
 - Length of Power Cable (standard is 25 ft)
 - AC to DC Power Supply (if required)
