

# KANE INSTRUMENTATION LTD.

*Specializing in Instrumentation and Oilfield Equipment*

## Electronic Wireline

### Features

- Depending on the application and its capacity, we can supply all kinds of sensors such as pressure transmitters (small npt connection or 1502 hammer union connection), load cells (clamp on, tension (pull), compression (push), load pins, dynamometers, etc.
- A s-link load cell get its name from its S shape.
- S-Link force sensors can provide an output if under tension or compression.
- They provide superior side load rejection.

### How To Order

- Maximum Load
- Length of Pigtail
- Type of Connector
- Connector cover (optional)
