Specializing in Instrumentation and Oilfield Equipment

Mechanical Depthometer

Features

- Mechanical Depthometers are built to last, with either bronzed busing or ball bearings on the rollers for extended life.
- Better still, the standard indicator features an easy-to-read counter display.
- Optional extra-large counter display can even be specified for greater visibility.
- With a highly dependable mechanical odometer, the Depthometer provides a continuous depth reading to a maximum of 99,999.9 feet, or with a metric readout to a maximum of 99,999.9.
- These Depthometers will handle wire line sizes from 7/16" to 1" OD.
- Designed and constructed to perform reliably and economically.

How To Order

- Measurement Unit in English or Metric
- Ball Bearing or Bronzed Bushing Rollers
- Options:
 - Poly-carbonate Case
 - Stand Mount
 - Large Counter Display
