

# KANE INSTRUMENTATION LTD.

*Specializing in Instrumentation and Oilfield Equipment*

## Piston Isolator

### Features

- Piston isolators are used to protect the measuring device from the working fluid while sending a pressure signal back.
- Also suitable to separate pressurized gases such as nitrogen or CO<sub>2</sub> in scouring applications.
- Reading accurate up to 140 ft which is twice the distance as the traditional diaphragm protector.
- 1502 or 2202 hammer union with either 2" NPT female sub or butt weld sub.
- Special seals combat acidic or granular operations.

### How To Order

- Maximum Working Pressure
- Hammer Union Size
- Type of Sub
- Standard or H<sub>2</sub>S Service
