KANE INSTRUMENTATION LTD.

Specializing in Instrumentation and Oilfield Equipment

Cement Recorders

Features

- There are two versions of cement recorders available.
- Truck mounted units are usually mounted directly on pump or service trucks.
- Portable units are freestanding and can easily be transported in a pickup truck.
- All recorders have 24-hour wind, 4-hour rotation chart drives with a start/stop mechanism and come in either single or dual pens.
- Single pen recorders measure one input while dual pen recorders can measure two pressure inputs at one time.
- These units are ideal for analyzing cementing, acidizing, fracturing, or just testing equipment.

How To Order

- Capacity of System
- English, Metric or Other
- Single or Dual Pen
- Portable or Truck Mount
