KANE INSTRUMENTATION LTD.

Specializing in Instrumentation and Oilfield Equipment

Electronic Pump Stroke Counter

Features

- Pump stroke counter systems measure the stroke rate and number of strokes on mud pumps.
- The oilfield pump stroke system is user-friendly and reliable and is configurable to measure a single mud pump.
- The mud pumps' stroke rate can be selected by toggling the display and is updated regularly for accurate monitoring.
- LED display indicates either pumps strokes per minute or the total number of strokes.
- Located on the display panel, push buttons provide easy operation and resetting of the pump.
- System includes a cable assembly, digital pump stroke counter, and proximity switch or limit switch with mounting clamp.

How To Order

- Type of Switch
- Length of Cables
- Bracket & Target (if required)
- Type of switch (Proximity or Mechanical)
